

Notes for MMR

Median - Put in order Least to Greatest. The one in the middle is the median. If 2 fall in the middle add those together and divide by 2. Ex: 1,2,2,3,4 Median = 2

Mean - Add all the numbers together and divide by however many numbers you added
 $1+2+2+3+4 = 12$ $12/5 = 2 \frac{2}{5}$ or 2.4

Mode - The number that you see the most in your data. Ex: 1,2,2,3,4 Mode = 2

Range - The difference between the lowest and the highest number. Ex: 1,2,2,3,4
Range = $4 - 1 = 3$.

Mean - Add all the numbers together and divide by however many numbers you added
 $1+2+2+3+4 = 12$ $12/5 = 2 \frac{2}{5}$ or 2.4
